

Structure projects

Lecture 6

Identify the needs and structure the environment accordingly

Structure

Content

- Structure

- Structure on set of the environment
- Security aspects
- Good to keep in mind

Structure

- Concepts for this lecture
 - Structure
 - Information security
 - Planning

Structure

- Environment and conditions
 - Size of the environment
 - As it is right now
 - Expected growth

Structure

- Environment and conditions
 - Accessibility requirements
 - SLA, how accessible must the environment or parts of it be?
 - Where are the hosts in the environment?
 - What roles do hosts have in the environment?

Structure

- Environment and conditions
 - Security
 - Sensitive information in plain text?
 - Is information about the environment itself sensitive?
 - Same users, keys and passwords everywhere?

Structure

- Environment and conditions
 - Hybrid systems
 - Just ansible? Or mixed technologies?
 - Combine ansible with state-keeping
 - Combine Ansible with scripts for more dynamic
